

CLEAN ROOM GRID SYSTEM

Exposed 24 mm grid system (nominal). A complete system solution: Aluminium construction for maximum corrosion resistance and non-magnetic environments. Co-extruded with a unique factory applied gasket for a better seal between tile and grid. System suitable for use in applications up to Class 4 performance as per Class ISO standard 14644-1.

CLEAN ROOM GRID SYSTEM

Key Attributes Physical Data

- Aluminium construction for maximum corrosion resistance and non-magnetic environments
- Unique co-extruded section aluminium based
- Unique, factory applied gasket for a better seal between tile and grid
- Staked on main runner splice for easy connections, integral hook cross tee end detail
- Hold down clips to ensure a good seal
- System suitable for use in applications up to Class 4 performance per ISO standard 14644-1

- **Material**
Co-Extruded Aluminium – Gasketed
- **Cross Tee/Main runner Interface**
Co-Extruded Aluminium Clean Room – Flush Fit
- **Product family**

- 1) Values in the above table conform to Class 1 as defined in EN 13964:2004+A1:2006 table 6.
For other classes /deflection limits please contact your **local Armstrong Technical Sales**.
- 2) Values are determined from laboratory tests methods in accordance with EN 13964:2004+A1:2006 clause 5.
- 3) Values are applicable for 600 x 600 mm tiles assuming that the maximum deflection of the grid is L/500 but not greater than 4 mm (L = span).
- 4) **No other applied loads such as luminaires, air diffusers, smoke detectors, sprinklers, hanging signs etc. are permitted.**
- 5) No overlays such as mineral wool or fibre glass quilts, as may be required for enhanced acoustic, fire or thermal performance, are permitted unless their full weight is established and included, together with the weight of the tile, within the appropriate weight groups.
- 6) For grid loading data calculated to different criteria than Class 1 to EN13964:2004+A1:2006, please contact your local **Armstrong Technical Sales team**
